## EXP NO:4 DATE:

### **RSA**

#### AIM:

To implement an encryption algorithm using RSA.

#### **ALGORITHM:**

```
Step 1: Generate two distinct prime numbers, p and q.
```

**Step 2:** Calculate the modulus, n, by multiplying p and q:  $n=p\times qn=p\times q$ .

**Step 3:** Calculate Euler's totient function,  $\phi(n)$ , where

```
\varphi(n) = (p-1) \times (q-1)\varphi(n) = (p-1) \times (q-1).
```

**Step 4:** Choose an integer e such that  $1 < e < \varphi(n) 1 < e < \varphi(n)$  and ee is coprime with  $\varphi(n)\varphi(n)$ , i.e.,  $\gcd(e, \varphi(n)) = 1$ .

**Step 5:** Compute the private key, d, using the modular multiplicative inverse of e modulo  $\varphi(n)\varphi(n)$ , i.e.,  $d\times e\equiv 1(mod\varphi(n))d\times e\equiv 1(mod\varphi(n))$ .

**Step 6:** Encrypt the plaintext message, M, using the public key (e, n), where the ciphertext, C, is calculated as  $C \equiv M^e \pmod{n} C \equiv M^e \pmod{n}$ .

**Step 7:** Decrypt the ciphertext, C, using the private key (d, n), where the original message, M, is recovered as  $M \equiv C^d \pmod{n} M \equiv C^d \pmod{n}$ .

#### **PROGRAM:**

```
import java.io.*;
import java.math.*;
import java.util.*;
public class GFG {
    public static double gcd(double a, double h)
    {
        double temp;
        while (true) {
            temp = a % h;
            if (temp == 0)
```

```
return h;
             a = h;
             h = temp;
       }
}
public static void main(String[] args)
      double p = 9;
      double q = 5;
      double n = p * q;
      double e = 2;
      double phi = (p - 1) * (q - 1);
      while (e < phi) {
             if(gcd(e, phi) == 1)
                   break;
             else
                   e++;
      int k = 2;
      double d = (1 + (k * phi)) / e;
      double msg = 12;
      System.out.println("Message data = " + msg);
      double c = Math.pow(msg, e);
      c = c \% n;
      System.out.println("Encrypted data = " + c);
```

Roll No:210701510

```
double m = Math.pow(c, d);
m = m % n;
System.out.println("Original Message Sent = " + m);
}
```

# **OUTPUT:**

```
Message data = 12.0
Encrypted data = 18.0
Original Message Sent = 29.0
```

**RESULT:**
